

Dear FCC, I own a satellite radio, and I do a lot of traveling. Being retired, I now have the time to see this beautiful country. It is important to me hear the traffic and weather report when I go through different states. Satellite radio is much clearer and the stations don't fade out like normal stations do.

So please let the satellite stations keep giving us this service. It is for my safety and everyone else who travels.

Thank You,

Roger Kafka
